THE FACTS THAT YOU ARE ABOUT TO KNOW WILL CHANGE YOUR BELIEFS ABOUT DANDRUFF.

And your current anti-dandruff shampoo.

BELIEF #1 DANDRUFF MEANS VISIBLE FLAKES AND WASHING IT OFF RELIEVES DANDRUFF PROBLEM

FACT: Flakes are just one of the symptoms of dandruff. Dandruff is actually a complex interlink of multiple, distinct problems caused by buildup of microorganisms on the scalp. These microorganisms manifest themselves as various symptoms ranging from flaking to itching to even fungal infection on the scalp. So, washing away flakes does not necessarily mean solving the dandruff problem.

SCALPE+ anti-dandruff shampoo is specially formulated to address these various manifestations. Its globally recognized Ketoconazole formulation inhibits the growth of dandruff causing microorganisms, thus providing a comprehensive solution to the dandruff problem.

BELIEF #2 TO CURE DANDRUFF, YOU NEED TO SHAMPOO YOUR HAIR DAILY

FACT: No! In fact, shampooing your hair and scalp daily can rid it of its natural oils and deprive it of nourishment leading to further dandruff related complications.

SCALPE+ anti-dandruff shampoo, as recommended by dermatologists, needs to be used only once in 3 days for 4 weeks for effective relief from all dandruff related problems. Since its Ketoconazole formulation is proven to be effective against dandruff causing microorganisms for 72 hours* from the first use itself, there is no need for you to shampoo hair daily.

BELIEF #3 DANDRUFF IS A RECURRING PROBLEM

FACT: Dandruff is an interlink of multiple problems such as itching/flaking/scaling, hair fall, & dryness. Moreover, use of regular anti-dandruff shampoos is inadequate to address each of these multiple problems, which usually leads to recurrence of the dandruff problem.

SCALPE+ anti-dandruff shampoo, is designed to address each of these interlinked problems to prevent frequent recurrence# of dandruff by completing the recommended regime of using it only once in 3 days** for 4 weeks.

SCALPE+
EXPERT ANTI DANDRUFF SHAMPOO

BELIEF #4 USING ANTI-DANDRUFF SHAMPOOS LEADS TO HAIR FALL

FACT: Dandruff brings along with it issues such as scalp itching, dryness, excessive scaling and flaking due to which there is a constant need to scratch the itchy scalp. Persistent scratching may cause damage to hair follicles making them prone to breakage. Furthermore, regular anti-dandruff shampoos containing surfactants make the scalp dry and itchy.

SCALPE+ anti-dandruff shampoo stops the growth of microorganisms causing dandruff, reduces the itchy scalp condition, and minimizes persistent scratching, thus relieving the hair fall~ issue.

BELIEF #5 ALL ANTI-DANDRUFF SHAMPOOS WILL CAUSE DRY HAIR

FACT: Most regular anti-dandruff shampoos contain detergent-based surfactants without a balancing conditioner base. Prolonged use of such anti-dandruff shampoos leads to dry and frizzy hair.

SCALPE+ anti-dandruff shampoo has a conditioning base, which protects the moisture on the scalp and hair. Also, due to its efficacious formulation, it has to be used only once in 3 days.** Hence, no risk of any dry or frizzy hair.

ADVT

If any of the above beliefs about dandruff holds true for you, you need to seriously reconsider your anti-dandruff shampoo.

Switch to SCALPE+ anti-dandruff shampoo, the Total Dandruff Solution for lasting relief from all your dandruff related problems.

*As per study published in International Journal of Cosmetic Science | #As long as shampoo is used
~Due to dandruff | Doctor's name is representative only. Not intended to be factual.
**To be used once in 3 days for 4 weeks and once a week thereafter as maintenance therapy
